

HIGHLIGHTS: As we continue into the hurricane season – Be Prepared! View various bulletins and outlooks. View various bulletins and outlooks issued by the Caribbean Regional Climatic Centre (Health, Agriculture, Heat Outlook etc.) Read the Caribbean Agro-Climatic bulletin of CarISAM and other national bulletins.

Fig 1: Rainfall Stations

KeyFig1	Station-Location	Rainfall (mm)
●	Argyle Int'l - Airport	155.4
●	E.T Joshua-Arnos Vale	195.1
●	Belle Isle	93.4
●	Rabacca	211.3
●	Belmont Agri.	216.1
●	Rivulet Climo.	136.7
●	Dallaway	310.5
●	Owia	141.4
●	Dumbarton	170.3

Tables 1&2: October 2025 Rainfall across SVG

The **highest maximum temperature**, 33.3°C was recorded on the 12th, the **lowest minimum temperature** was 21.5°C, recorded on the 23rd. The **Average maximum temperature** was 31.7°C and **average minimum temperature** was 24.1°C. **Average daily mean temperature** was 27.9°C.

The **maximum wind gust** for October is currently unavailable.

Forecast Information

KeyFig1	Station-Location	Temperature (°C)
●	E.T Joshua-Arnos Vale	29.7-30.0

Table 3: Nov-Dec-Jan 2025-26 usual range of temperature (between lower and upper threshold values)

National Temperature Outlook: Nov-Dec-Jan 2025-26 for SVG

- **Air Temperature:** Day and night time temperatures are predicted to be above the usual.
- **Sea Surface Temperatures (SSTs):** Warm sea surface temperatures in the Caribbean Sea contributing to higher air temperatures.

October 2025 Summary

During the month of October occasional cloudy skies and scattered showers. Various weather and marine advisories were issued and varying concentrations of Saharan dust haze traversed our islands. Despite the passage of these weather systems, high temperatures persisted and the month was generally warm.

The total rainfall for the month of **October** at the **Argyle International Airport (A.I.A)** was **155.4 mm** (~6.1 inches). Island-wide, the highest monthly rainfall total was **486.4 mm** (~19.1 inches) recorded at the **Hermitage Station**.

KeyFig1	Station-Location	Rainfall (mm)
●	E.T Joshua-Arnos Vale	478.2-599.9

Table 4: Nov-Dec-Jan 2025-26 usual range of rainfall (between lower and upper threshold values)

National Rainfall Outlook: Nov-Dec-Jan 2025-26 for SVG

- Rainfall is likely to be the usual or lower.
- Water resources should be monitored.

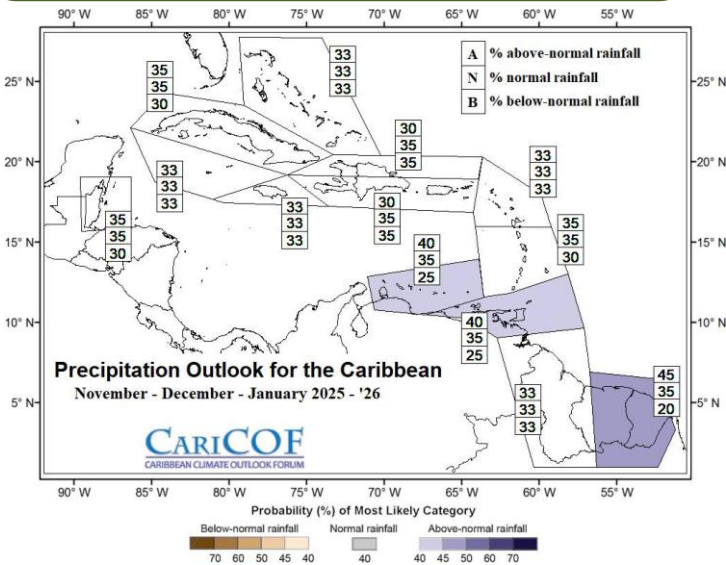

Fig 5: Regional Precipitation Outlook for Nov- Dec-Jan 2025-26

Advisory Statements

Water: The Central Water and Sewage Authority (CWSA) should continue to urge the public to conserve water. All pipe leaks should be reported and repaired immediately to avoid wastage

Health: Morbidity from excessive heat due to high temperatures across the region could become an issue for the upcoming months. Saharan dust episodes will persist, therefore attention should be placed on monitoring and updates to reduce the risk of exacerbations of respiratory illness in susceptible persons. Anti-mosquito fogging operations should continue as the presence of stagnant water after rainfall may promote the breeding of mosquitoes.

Agriculture: To ensure food security, farmers are strongly advised to make preparations to employ conservation and irrigation practices. Planting more resilient crops during this period should be considered. Soil conservation should be practices as sudden downpours can cause soil erosion.

Tourism: Hoteliers should continue to practice water conservation. Visitors need to be advised as the heat season continues. Also, prepare for episodes of rainfall of varying intensities over the coming months.
