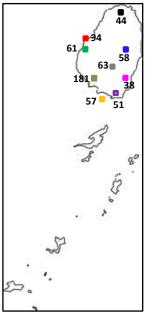

Fig 1: Rainfall Stations

August 2025 Summary

During the month of August, Hurricane Erin, an area of disturbance associated with a tropical wave and weak low-level instability affected our islands resulting in occasional cloudy skies and scattered showers. Various weather and marine advisories were issued and concentrations of Saharan dust haze traversed our islands. Despite the passage these weather systems, temperatures persisted and the month was generally warm. The total rainfall for the month of August at the Argyle International Airport (A.I.A) was 37.7 mm (~1.5 inches). Island-wide, the highest monthly rainfall total was 321.8 mm (~12.6 inches) recorded at the Hermitage Station.

KeyFig1	Station-Location		
•	Argyle Int'l - Airport		
•	E.T Joshua-Arnos Vale	56.6	
•	Belle Isle	60.9	
•	Rabacca	57.7	
•	Belmont Agri.	94.2	
•	Rivulet Climo.	50.5	
•	Dallaway	181.1	
•	Owia	44.1	
•	Dumbarton	63.2	

Tables 1&2: August 2025 Rainfall across SVG

The **highest maximum temperature**, 33.6°C was recorded on the 22nd; the **lowest minimum temperature** was 22.4°C, recorded on the 6th .The **Average maximum temperature** was 31.7°C and **Average minimum temperature** was 24.5°C. **Average daily mean temperature** was 28.1°C.

The maximum wind gust for August is currently unavailable.

Forecast Information

KeyFig1	Station-Location	Temperature (°C)	
•	E.T Joshua-Arnos Vale	30.7-31.1	

Table 3: Sept-Oct-November 2025 usual range of temperature (between lower and upper threshold values)

National Temperature Outlook: Sept-Oct-Nov 2025 for SVG

- Air Temperature: Day and night time temperatures are predicted to be above the usual.
- Sea Surface Temperatures (SSTs): Warm sea surface temperatures in the Caribbean Sea contributing to higher air temperatures.

KeyFig1	Station-Location	Rainfall (mm)
•	E.T Joshua-Arnos Vale	672.2-804.4

Table 4: Sept-Oct-Nov 2025 usual range of rainfall (between lower and upper threshold values)

National Rainfall Outlook: Sept-Oct-Nov 2025 for SVG

- Rainfall is likely to be the usual or lower.
- Water resources should be monitored.

Advisory Statements

Water: The Central Water and Sewage Authority (CWSA) should continue to urge the public to conserve water. All pipe leaks should be reported and repaired immediately to avoid wastage

Health: Morbidity from excessive heat due to high temperatures across the region could become an issue for the upcoming months. Saharan dust episodes will persist, therefore attention should be placed on monitoring and updates to reduce the risk of exacerbations of respiratory illness in susceptible persons. Antimosquito fogging operations should continue as the presence of stagnant water after rainfall may promote the breeding of mosquitoes.

Agriculture: To ensure food security, farmers are strongly advised to make preparations to employ conservation and irrigation practices. Planting more resilient crops during this period should be considered. Soil conversation should be practices as sudden downpours can cause soil erosion.

Tourism: Hoteliers should continue to practice water conservation. Visitors need to be advised as the heat season continues. Also, prepare for episodes of rainfall of varying intensities over the coming months.
